Planet Ocean Underwater Hotel could make history with the US Patent Pending Ocean TRASH Removal Vessel

Leading provider of underwater luxury, Planet Ocean Underwater Hotels LLC, announces the industrial plastic trash removal project - the Ocean TRASH Removal Vessel

1/2

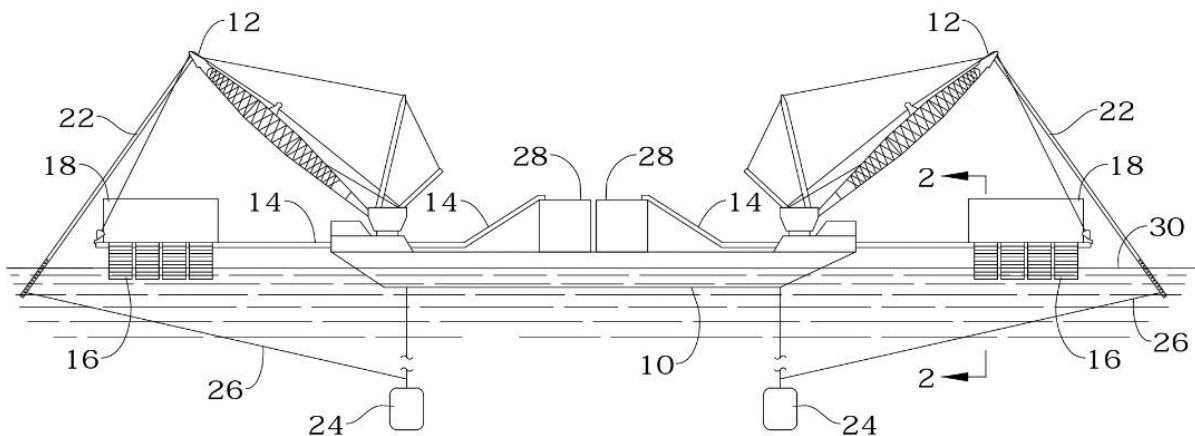

FIG. 1

Planet Ocean Underwater Hotels LLC is one of the leading providers of affordable underwater hotel services with the aim of funding and implementing a worldwide proven coral reef restoration and aquaculture solutions/technologies. As part of the company's goal of saving the ocean and the Planet Earth as a whole from the on-going daily destruction, Planet Ocean Underwater Hotels LLC has announced the launch of an Ocean Trash Removal Vessel project to help in extracting ocean plastic trash and environmental safely process the plastic trash into GREEN energy fuel.

Idyllic Caribbean Island Covered In A Tide Of Plastic Trash Along Coastline

The subject of ocean pollution has been on the lips of several environmentalists and other such stakeholders, particularly as figures, show an unfortunate steady increase in the situation. Plastic waste and the disposal are some of the biggest pollution issues the world is currently battling with and the ocean has not been left out. The United Nations Environment Programme estimated in 2006 that every square mile of ocean contains 46,000 pieces of floating plastic. Studies have also revealed that plastic debris causes the deaths of over a million seabirds every year and more than 100,000 marine mammals. Therefore, it has become imperative for the world to take the bull by the horns and address the issue of ocean pollution heads on.

The US Patent Serial No. 62/703,693 Ocean Trash Removal Vessel – OTRV by Planet Ocean Underwater Hotels LLC is an innovative solution that deserves all the accolades possible. The project is targeted at the top 20 of the world's worst plastic trash pollution rivers.

The first full operational OTRV is to be supported by an oil giant, who happens to be the world's largest industrial corporation. After the 9 month fabrication process, the OTRV will be first anchored at the Caribbean's worst plastic trash river. With world media present, the OTRV crew will daily demonstrate and prove our actions of environmental friendly plastic trash removal and shortly thereafter processed into GREEN energy fuel.

In addition to saving the world by ensuring oceans are cleaner and safer, the OTRV will also go a long way in helping to bring the Planet Ocean Underwater Hotel project to life as profit from the sale of the OTRV will be used in building the long awaited underwater hotel. Therefore, persons and institutions interested in supporting the laudable cause can donate on the Planet Ocean Underwater Hotel [website](#). Planet Ocean Underwater Hotel is also available on [Facebook](#) and [Twitter](#).
